**Abdumutalliyev Abdulaxad Abdusamad o'g'li**

Assistant of Namangan Institute of Engineering and Technology

**Abstract:** This in thesis to Namangan region investment attraction to do through small business and private entrepreneurship in development of ways about data given.

**Key words:** economy, investment, small business and private entrepreneurship, development, statistics.

**Induction.** Whole in the world the economy motivator power as small business and private entrepreneurship field main place take over is coming of the world developed countries France, Italy, Japan, Germany, USA in the states Gross Internal In the product small business and private entrepreneurship share is 50-60 percent around is this indicator is 2020 in Uzbekistan and 53.9 percent organize is doing small business and private entrepreneurship share more in development of investments place is incomparable. Our country to the regions being separated investment the amount how being distributed statistics learning important

**Main text.** Commerce banks by to entrepreneurs being separated loans volume increased. Such practical measures own the result is giving Small business our country gross internal of the product about 60 percent of the industry products of size from three one, a village farm 98 percent of products, investments half is providing. This only Namangan region in the example seeing coming out if, 2021 - year January-December months new organize found small enterprise and micro firms regions according to the most many in the city of Namangan - 1589, Chust district - 434, Pop district 400, Namangan district - 392, Uchqorgon in the district - 386, Uychi in the district - 367 organize reached. The lowest indicator New York 268 in the district

organized. January-December 2021 small entrepreneurship of subjects by number (per 1000 inhabitants, in units). regions in the section the most a lot indicator is 12.9 in Namangan city, 12.8 in Namangan district, Mingbulok 11.4 in the district, Chust 10.5 in the district, 9.1 in the Chortoq district, Uchqorgon 9.0 units in the district organize did This the indicator is 7.8 and in the Pop district Torakorgon 7.7 units in the district organize reached as low as remains in Namangan region small business and private entrepreneurship development : 2022 in January - March small entrepreneurship of subjects Gross Internal In the product share is 63.1 % organized. Small business of subjects number is 10.0 units per 1000 inhabitants organized. Activity walking small enterprise and micro firms the number is 29 thousand 526 enough 2022 year 1379 new ones in January - March small enterprise and micro -firms ( farmer and farmer without farms ) organization done Initial three month results according to small entrepreneurship subjects by main to capital directed investments by 19.1 % increased to 2 trillion. 89 billion soums organized. Industry work release volume 1 trillion. 275.1 billion soums organized. Export volume is 50.3 million dollars, import is 127.2 million dollars. Highlight this is necessary projects work on the way out economic of development growth points - " drivers". determination the way with region of possibilities maximum level use in order to region and district cities strong and weak sides studied such drivers in the province one textile industry is his technological development level external in the market buyer was high good quality ready products work release enable is giving Leader foreign brands under ready clothes are yesterday work release for foreign brands with connections installation through for export for sale textile of products addition value to increase separately accent given - in the region rope again work level by 95 % increase planned. In the future internal brands Create and them external to markets before push measures on complex done is increased.

**Conclusion.** Small business country economy adding contribution increase, small industry zones creation, investment environment and competition environment improvement, small business with public-private partnership within state purchases size expansion, large and small enterprises in the middle mutually beneficial cooperation strengthening, innovation can processes entrepreneurship subjects

attraction to do through let's see we say maybe an investment attraction any made field without development won't stay Local and foreign investments wide attraction to do for in Namangan region investment environment more improve and attractiveness increase through field and regions economy our promotion.
