***Ключевое слова:** Отношение молодежи к виртуальным сетям.*

The most urgent issue in our current developing era is modern means of communication and the rapid development of the internet is a small device that has stolen the imagination of young and old.

The internet is global net working platform and the guiding light of today's technology over 7 billion wireless device users use internet technology to perform various tasks. Due to its major growth gadgets like laptops, tablets and smartphones have become common place, also people across the world use social media. Apps such as Facebook, Twitter and Whatsapp, Telegram and Instagram, YouTube to communicate with family and friends.

Statistics show there is a significant increase in the Internet has had a net positive impact on education. It is a vital side that the development of innovative technologies has created a great deal of conveniences for people and society.

These days the internet have the most significant roles as an evidence in storing, presenting and processing data. Internet let you access loads of information on almost any subject under the sun. The Internet is like a hyge invisible world .which can store and organize large collocation of data . The Internet have purchased and have sold about numerous changes in workplace with laptop.

The internet and e-mail are just two examples of many features that computers can offer. This enables workers to work from home.

The advantages of internet include speed, accuracy adaptability, Compatibility, high memory capabilities, ability to perform complex tasks to show ana example performing mathematical, logical and statistical operations. The most interest side is Entertainment such as playing music, storing photos, playing video games.

Besides multimedia, interactive software and virtual reality all make studying and learning processes more exiting and enjoyable. Word processors enable students to write letters and reportaj do projects and Conventional teaching methods.

But many people are made redundant and unemployment rate is dramatically rising Millions of people losing their jobs because of main reason internet and computerisation. In particular a myread of postmen lost their jobs because noone read newspapers and magazines in these days

All of people are informed a brand new and the latest information by internet.

The worst side is too harmful to our health. They may cause problems such as obesity, strain to our eyes ,back or neck pain that is known as Repetitive Strain Injury. Internet bombard us with radioactivity

In other words internet has been negative when it comes to morality and politics, more and more people spend a myread of significant time on social media platforms tend to be lonely and socially isolated .

Young and older people addict to the internet besides increase of cybercrimes and these often manifested fraud and hacking with these revelations the dark web has become a popular platform to trade stolen data and materials. In recent statistic show

that the attitude of people who are addicted to the internet to their parents and family is worst situation .

They can not express feeling openly .

A lack of national customs , irresponsibility for one's work

The lowest level in sports on the social and cultural spheres.

Most of such people have the most frustration and incompetence.

70-80 percent of the young generation have already become captives of the global network, they are so attached to the internet that they don't even notice the dawn or dusk with it. It should not be forgotten that today even a small message, which at first glance seems to be insignificant, directed against the human spirit, can cause enormous damage, which is not visible to the eye, but cannot be compensated by anything.

It is regrettable that they suffer from negative aspects such as gaming excess weight, laziness, decreased eyesight, inability to concentrate, insomnia . The main point is that we did not perceive which information on social networks is plus and which is minus for us.

We need to increase our potential in every way prevent negative aspects.

It should be noted our country's to young people have been given ample opportunities to use modern innovative media and systematic active technologies.

If we say that the world is a big river, it is the duty of the youth to effectively use the conditions created to swim in this river without drowning.
